# Veltz<sup>TM</sup> Cutting Saw

Veltz's 20" | 24" hand saw tungsten carbide tipped cutter Blade for cutting Aerated Concrete Bricks and AAC Masonry Cement Blocks size 500mm.

## Special Feature:

- ✦ Powder Coated
- ✦ Rust Proof
- ✦ Eco - Friendly
- ✦ Ensuring secure and reliable cutting performance over time
- ✦ Induction Hardened Teeth: For Long Lasting Sharpness, Smooth and Clean Cuts
- ✦ Triple Ground Teeth: For fast and smooth cutting

Brand	Veltz
Blade Length	500 Millimetres
Item Dimensions LxWxT	68 x 115 x 2 Centimetre
Number of Teeth	13 Grover & 13 tungsten carbide tipped
Cutting Angle	90 Degrees
Item Weight	825 Grams
Amperage	3.4 Amps
Special Feature	Ergonomic

# Veltz<sup>TM</sup> Cutting Stand

Veltz Cutting stand helps to position the AAC blocks perfectly and helps to cut the blocks in 90 degrees and it helps to avoid floor damage.

## Veltz<sup>TM</sup> 90° Cutting Angle

Provides 90 degree accurate cutting to get a proper rectangular shape blocks which helps to avoid the waste of joining glue .

# Veltz<sup>TM</sup> Grooving Rod

Veltz Grooving tool electrical wiring and plumbing pipes can be easily installed in walls. It is a manual solution for creating a conduit cut outs .No power or No more electrical equipment needed for grooving the wall .

# Veltz<sup>TM</sup> Notched Trowel

Veltz notched trowel is with special stainless steel having high wear resistance and perfect flatness. A notched trowel is used to spread adhesive and a thin set of 3mm. It differs from a regular trowel in that it has notches, usually on two sides of the blade. Running a notched trowel over adhesive or thin-set leaves behind rows of the product.

Packaging

- 6 mm X 6 mm notch (for 3 mm bed thickness)

# Veltz™ Box Trowel

Veltz Adjustable Box trowel is with special steel having high wear resistance and perfect flatness. A Box trowel is used to spread adhesive and a thin set. It differs from a regular trowel in that it has notches, usually on two sides of the blade. Running a notched trowel over adhesive or thin-set leaves behind rows of the product

## Veltz™ Box Trowel

Veltz Fixed Box Trowel is manufactured using special high-grade steel that offers excellent wear resistance and superior flatness. This box trowel is designed for spreading adhesive and thin-set materials efficiently. Unlike a regular trowel, it features fixed notches—typically on two sides of the blade. When the notched edge is drawn across adhesive or thin-set, it creates uniform ridges that ensure proper material distribution and strong bonding.

## Veltz™ Bucket Trowel

Veltz Bucket Trowel is a high carbon steel and spring steel metal with high quality powder coating. This bucket trowel suits for laying joining glue on 4"/6"/8"/9" thickness AAC blocks.

Bucket trowels are wide-bladed tools for scooping mortar from a bucket. They are ideal for smoothing mortar on large bricks and blocks.

## Veltz™ Rubber Hammer

Provides 90 degree accurate cutting to get a proper rectangular shape blocks which helps to avoid the waste of joining glue .
